

Programs and Services

Helpline (888 - 280 - 6055) is a professionally staffed, toll-free contact center that provides callers with confidential and personalized in-depth guidance about Alzheimer's disease and dementia to assist with planning, problem solving, referrals to community resources and emotional support.

Respite Care and Wellness Program Our Respite Care and Wellness program is designed to provide family caregivers with information and education about the importance of regular time-off from caregiving, and help link them to available community-based respite care resources. We also provide a financial scholarship of \$1,000 to help off-set the expense associated with respite care services.

Family Support Group Programs are always free and open to the community. The groups provide families and caregivers with the emotional support and education they need to better understand Alzheimer's disease and related dementia disorders.

Community and Professional Education and Training Education and training are the core of our mission. We are dedicated to providing education and training to individuals and families, health care providers, and all the various business and public and community agencies throughout New Jersey. We offer programs throughout the year in a variety of community and professional venues.

Clinical Trial Connections® Program The *Clinical Trial Connections* program provides assistance to individuals and families who may be interested in participating in a clinical trial, to find out more about available trial programs in, and around, the communities where they live.

Always Safe® is a safety awareness and promotion program designed for individuals with Alzheimer's disease and dementia who have a greater personal safety risk due to their impairment in memory and cognition. In addition to a registry database, *Always Safe* provides individuals and families with educational information and resources about home and personal safety, and provides professional education and training about Alzheimer's and dementia to New Jersey law enforcement and emergency first-responders.
